EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER II

Anvex AI Technologies

JUNE 2025 – PRESENT

- Promoted from **Full Stack Developer Intern** to **Junior Full Stack Developer** and subsequently to **Software Development Engineer II** within 10 months, recognizing exceptional performance, technical ownership, and consistent project delivery.
- Developed and maintained scalable full-stack applications using **React.js, Node.js, Express.js, NestJS, Python, MongoDB, and MySQL**, following clean architecture and microservices principles.
- Improved system performance and scalability by implementing **Redis caching** and **worker-based** asynchronous processing for AI workloads and long-running background tasks.
- Developed and enhanced AI-powered enterprise platforms, including an **end-to-end Voice Assistant Platform** with **RBAC**, reporting dashboards, **event-driven architecture**, and scalable backend services capable of handling **200K–300K** daily calls, alongside a **Computer Vision Analytics & Alerting System** featuring **real-time visual analysis**, intelligent annotations, **analytical** reporting, **anomaly** detection, and **automated email/WhatsApp notifications**.
- Developed and deployed applications on **AWS** infrastructure using **EC2** and **S3**, while managing **CI/CD** pipelines with **GitLab**, **Docker** and implementing **AI-powered automation** solutions within Agile/Scrum environments.

EDUCATION

Universal MSG-SGKM College of Arts, Science & Commerce

Ghatkopar, MH

JUNE 2022 - MAY 2025

CGPA: 9.28/10

PROJECTS: <https://github.com/DaiveshNaik>

Portfolio: daiveshnaik.codes

E-Commerce Multi-Vendor Platform with AI Chatbot

Tech Stack: React.js, Node.js, Spring Boot, MySQL, REST APIs, JWT, Generative AI, Stripe & Razor pay

- Built a full-stack multi-vendor marketplace enabling vendor onboarding and product management
- Integrated AI-powered chatbot for customer support
- Implemented JWT authentication and optimized backend services for scalability.

Task Management System with Live Chat box

Tech Stack: React.js, Java, Spring Boot, MySQL, REST APIs, JWT, WebSocket, Git, Razor pay

- Developed a full-stack task management application enabling task creation, assignment, and progress tracking with secure JWT-based authentication.
- Implemented real-time chat functionality using WebSockets to support instant in-app team communication.
- Optimized MySQL queries and RESTful API performance to enhance system efficiency, scalability, and user experience.

CERTIFICATIONS : [Link](#)

Deloitte Australia Technology Job Simulation on Forage - May

- Completed a job simulation involving development and coding
- Designed and documented a technical dashboard solution during a real-world job simulation.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java

Frontend: React.js, Next.js, Angular, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, NestJS, Spring Boot, REST APIs, WebSockets

AI & Machine Learning: LLM APIs, RAG Pipelines, Gemini AI

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps: Docker, AWS (EC2, S3), GitLab, CI/CD, Git, GitHub

Architecture & Systems: Event-Driven Architecture, Background Workers, Job Queues

Tools: Postman, Jira, n8n, Figma, Zoho Teams, Zoho Connect
